WORK EXPERIENCE

Wovenware

Software Developer

San Juan, Puerto Rico

May 2021 – Present

- Developed .NET code for three backend-focused software applications, maintaining best coding standards for both private and government clients with over 1.4 million users, contributing to overall system stability and performance.
- Participated in the migration to Azure Cloud, assisting in enhancing scalability and reducing operational costs by approximately 76%.
- Participated in the adoption and implementation of new development workflows, including the integration of automated testing procedures. This initiative significantly reduced manual testing time in the testing phase, ensuring timely project completion.
- Assisted in implementing core services, web services, and WCF services in a SOAP API, facilitating better communication between systems.
- Created SQL scripts and stored procedures for data validation and development tasks, helping streamline database operations and maintain data integrity.
- Utilized Agile methodologies, Azure DevOps, Azure Cloud, Git Version Control, and Command Line tools, contributing to the successful and timely delivery of projects.
- Participated in daily stand-up meetings and performed code reviews, ensuring adherence to coding standards and contributing to team knowledge sharing.
- Collaborated with cross-functional teams throughout all project phases from development to testing and documentation, contributing to comprehensive project outcomes.

SKILLS

HTML/ CSS, SQL (PostgreSQL, MySQL, SQL Server), JavaScript (Angular), C#, .NET, REST APIs, SOAP APIs, Azure Cloud, Git, Java, Spring, Python

LEADERSHIP AND COMMUNITY INVOLVEMENT

The Jane Stern Community Library

Dorado, Puerto Rico

Volunteer

Jun 2015 – Jul 2015

- Tutored members of the Dorado community who could not afford tutoring from other sources.
- Specialized in high school-level mathematics to teach students who initially did not understand concepts.

EDUCATION

Boston College, Chestnut Hill Massachusetts

Computer Science B.S, Honors Program 2020

2020

Major GPA: 3.45

Coder Foundry, North Carolina

Web Software Engineer

September 2020 – December 2020

- Created a portfolio and blog site using C#, MVC, HTML5, CSS3, Bootstrap, JS & jQuery.
- Fully designed and developed a multi-functional issue tracker web application, implementing enhanced roles & security, including a Code-First relational database designed and modeled in PostgreSQL.
- Technologies used include: .NET Core v3.1, MVC6, C#, LINQ, PostgreSQL, Entity Framework, Docker, PgAdmin, Heroku, and jQuery DataTables.
